CS471 – Web Technologies (Laboratory)	Qassim University College of Computer	Lab 5
		HTML and CSS (Part 2)

This lab session covers additional HTML and CSS Fundamentals (part2). By the end of this session, students should have a very good understanding of how to integrate links, text formatting, lists, and tables into arbitrary webpages with static files in Django framework.

Pre-lab Preparation:

1. Having bookmodule and usermodule in apps directory, each containing separate URL configurations.
2. Template directory located in 'apps' with necessary settings.

Lab Activities:

Task 1: (Links and layout customization) Create a page with the URL '/books/html5/links' to display the following. You should use external CSS (main.css) with class and id for styling purposes (having padding, text center, text color, background color, and display as a block). Also, you should add different styles to each state, which a link can have, such as visited, hover, and action.

Task 2: (Text formatters (nested formatters)) Create another page with the URL '/books/html5/text/formatting' to display the following. You may use the external CSS file 'main.css' to add style for the h1 tag that contains 'Example of Formatting tags'

127.0.0.1:8000/books/html5/text/formatting

Example of Formatting tags

This text has **subtext** using b tag

This text has **subtext** using strong tag

This text has *subtext* using i tag

This text has *subtext* using emphasize tag

This text has subtext using small tag

This text has subtext using mark tag

This text has ~~subtext~~ using del tag

This text has subtext using ins tag

This text has $X_{subtext}$ using sub tag

This text has $X^{subtext}$ using sup tag

127.0.0.1:8000/books/html5/text/formatting

Example of Formatting tags

This text has **subtext** using b tag

This text has **subtext** using strong tag

This text has *subtext* using i tag

This text has *subtext* using emphasize tag

This text has subtext using small tag

This text has subtext using mark tag

This text has ~~subtext~~ using del tag

This text has subtext using ins tag

This text has $X_{subtext}$ using sub tag

This text has $X^{subtext}$ using sup tag

Task 3: (Listing (nested)) Create a third page with the URL '/books/html5/listing' to display the following. You may also add style to the external CSS file 'main.css'

127.0.0.1:8000/books/html5/listing

The Best Features of the Internet

- You can meet new people from countries around the world.
- You have access to new media as it becomes public:
  - New games
  - New applications
    1. For business
    2. For pleasure
  - Around the clock news
  - Search engines
  - Shopping
  - Programming
    1. XML
    2. Java
    3. HTML5
    4. JavaScript
    5. New languages
- Links
- Keeping in touch with old friends
- It's the technology of the future!
